ERRATUM TO THE 16.50 LECTURE NOTES

- **Lecture 1**
  Page 3, paragraph beginning with "Clearly, the smaller \( \frac{m(t)}{m_o} \ldots \), replace \( m_{\text{prop}} \) by \( m'_{\text{prop}} \).

- **Lecture 6**
  Page 6, third paragraph ("The conclusion that…"), end of the first sentence, replace mode by model.

- **Lecture 9**
  Page 4, first formula, erase an \( n \) on the right hand side. Thus, the formula becomes:
  \[
  a_p c_0 \frac{A_1}{c_*} = \rho_p \frac{a A_n n}{a c_* \rho_p A_n} \frac{A_2}{c_*}
  \]

- **Lecture 26**
  Page 2, sentence before the last equation for the Zweifel Coefficient, change \( M^2 \) to \( M_2 \) in \( M_2 \ll 1 \).

- **Lecture 28**
  Page 4, last paragraph, line above the last formula replace \( s_c \) by \( \sigma_c \).

- **Lecture 31**
  Page 2, last paragraph, add **the disk** in: "\( e \) is the displacement between the center of **the disk**, \( c \), and the center of (low speed) rotation."
