Hi all,

You are getting this e-mail because you have expressed interest in taking the CI-M component of 2.ThA during IAP, 2007. The schedule has been fixed as Mondays and Thursdays, noon => 2:00 PM; that is, January 8, 11, 18, 22, 25, 29, & Feb 1. There is no class on January 15 on account of the Martin Luther King holiday. The room scheduling will occur in mid-November; expect a small classroom on the main campus.

If you have not done so already, I encourage you to locate a thesis advisor and project in the next few weeks; I recommend trying to get this initial hurdle accomplished before the Thanksgiving holiday. Due to the compressed schedule of the IAP subject, there will not be much time to find a thesis project once IAP has started. Further, a few weeks head start on the background reading and a holiday break to brainstorm ideas will improve both the thesis work and the proposal writing. If you are having difficulties finding a thesis project, please let me know.

Once you have identified a thesis project, please fill out a thesis intent form (available on the web at https://web.mit.edu/2.tha/www/2A_Thesis_Intent_Form_SS06_rev_A.pdf) and get the completed form to Peggy Garlick in the MechE undergraduate office (1-110).

Please let me know if you have questions about the IAP 2.ThA class.
