...UPCOMING SIPB EVENTS...

Cluedumps ~ Mondays 8pm ~ 3-133

SIPB will be offering a series of “cluedumps” Monday evenings this term at 8pm in 3-133 to useful or interesting technical information. Cluedumps are designed with the SIPB member and prospective in mind, but anyone can attend! Join us at any session, or walk over with us after our general meetings (Mondays, 7:30pm).

Sep. 11	How Athena Works
Sep. 18	AFS
Sep. 25	Locker management & Hesiod
Oct. 2	scripts.mit.edu
Oct. 9	The Law (copyright, etc.)
Oct. 16	TBD
Oct. 23	TBD
Oct. 30	TBD
Nov. 6	TBD
Nov. 13	Design of IM Systems

We are still working out the schedule for the later Mondays in term. Expect to see the following classes, in some order, in the empty slots:

```
E-mail at MIT
Authentication & Kerberos
Debian Packaging
Debian-Athena
Internet Architecture
Audio/Video Compression
Xen & virtualization
SAP, Roles, Warehouse, etc.
```

and perhaps more! Email cluedumps@mit.edu for more information, or just show up!

Computer Tours ~ Wed. Sep. 6 7pm ~ Lobby 7

Ever wanted to learn more about the computing infrastructure at MIT, or the neat things that MIT research groups do? Come to SIPB Computer Tours! We'll be visiting the the W91 and W92 machine rooms, the MIT Information Services and Technology space in N42, the Wearables group in the Media Lab, and various labs in CSAIL. We'll close out the evening with storytime with Jeff Schiller, MIT's Network Manager.

Hackathon ~ Sat. Sep. 9 2pm ~ W20-557

Join us in our office (W20-557, outside the Athena cluster). We'll be hacking on various SIPB projects, and invite you to join us! An excellent opportunity to learn about projects in development, chat with members and other prospectives, and dive into a project of your own! Whether you want to just hang out, or want to become involved in an existing project or start your own, we'd be delighted to have you swing by. The hackathon starts at 2pm and will end when we get tired (probably midnight. ish. 3am counts as midnight-ish, right? call x3-7788 if you want to know if the hackathon is still going).

Check out some of our most popular services!

scripts.mit.edu – Run scripts for your MIT webpage from our server. See `http://scripts.mit.edu` for more info.
linerva.mit.edu – All MIT's Athena dialups run Solaris. Need a Linux dialup? Use `linerva`.
http://web.mit.edu/debathena/ – Want to Athenize your Debian box? Check out our packages.
