

40 U.A.S. 4.1

Bill to create \LaTeX bill class for the UA Senate

Whereas UA Bills should look pretty; and

Whereas writing pretty bills should be easy; and

Whereas \LaTeX is an excellent language for creating pretty documents, but has an unfortunately steep learning curve, making it difficult for the layman to create a nonstandard document without assistance from an expert;

Be it enacted, by the Undergraduate Association assembled in Senate:

That the UA Senate shall create a \LaTeX class to facilitate writing bills, and

That this class shall be distributed to members of the UA senate, and

That this class shall properly indent long clauses, such as this one, using a hanging indent, such that lines after the first shall be indented relative to the rest.

Respectfully submitted,

Nelson Elhage
UA Senator from Off-Campus

Alex Dehnert
UA Senator from the LGC
