File No. 5104

## CLASSIFIED EYES ONLY

## Project 6720 - SNOWDRIFT

These are instructions for how to construct a program that will close a Class IV rift. You will need to construct a device capable of storing the program and uploading to to various terminals. The materials needed to construct this device are stored in a number of labs in Dunwich. The first six pieces can be found in the Turing Lab.

*[out-of-game: ... The printer seems to have failed at this point, because the next few lines are a bunch of gibberish. Damn budget cuts... ]*
