Abstract

Insert your abstract here. No *REVTEX* limit to number of lines.

1. Introduction

Introduction goes here... Most TeX, *REVTEX* and LaTeX commands begin with a backslash. See the manual for a list of special, non-printing characters (Appendix B and Table 5).

2. Insert your section title here.

Copy the above line to head each section. Section 2 text goes below. Please use the `\verb` command to print passages with special characters in the text. Surround the special characters with "+" signs. Please use the `\cite{RefTag}`[1] command to cite references in the text.

Create equations, lists, and tables using standard *REVTEX* 3.0 macros. See the manual and examples for further instructions. Please place tables and figure captions at the end of your manuscript. Examples are shown below. I feel these examples are necessary because the spelling and syntax of some commands have changed, compared to earlier versions of *REVTEX*.

REFERENCES

1. Author, "Title," Journal **Volume,** page numbers (year).

FIGURES

Fig. 1. Please place your figure caption here.

TABLES

Table 1. Please place your table caption here.

One	Two	Three	Four
