1 Program ccalc

1.1 Purpose

Perform interactive arithmetic calculations.

1.2 Usage

ccalc

The computer will respond with the prompt:
`calc>`

1.3 Notes

- The user may enter any valid arithmetic expression, using +, -, *, /, **, and parentheses.
- Intermediate results may be stored in variables ‘a’ through ‘z’.
- Refer to the documentation for program 3dcalc for a list of built-in functions.
- To exit the program, type ‘quit’.
