The raw database from which the catalogs are derived can be examined in **/mit/mitsfs/Public/datadex** on Athena. There is also a Web interface at **http://www.mit.edu:8001/pinkdex** which can be used for title and author searches. Our homepage is at **http://www.mit.edu/~mitsfs/**.

Please mention errors in the catalog on the other side of this page.

New first copies of books may be on the New Books shelf rather than with the rest of their category. Monthly catalog supplements of new first copies are kept at the New Books shelf for a year.

The `CODE` column entries look like `(code):(multiplicity)`, or just `(code)` if we've only one.

The codes are defined as follows (ask a Keyholder what the categories are):

C/P, C/PA	Circulating Paperback, Circulating Paperback Anthology
P, PA	[Reserve] Paperback, Paperback Anthology
H, HA	[Circulating] Hardcover, Hardcover Anthology

Unearthed Errors

Found an error in the catalog? We'd like to know so we can fix it. Please give author and title as currently listed and what's wrong (something is misspelled, the book should be listed as being in series X, etc).
