

# SIPB

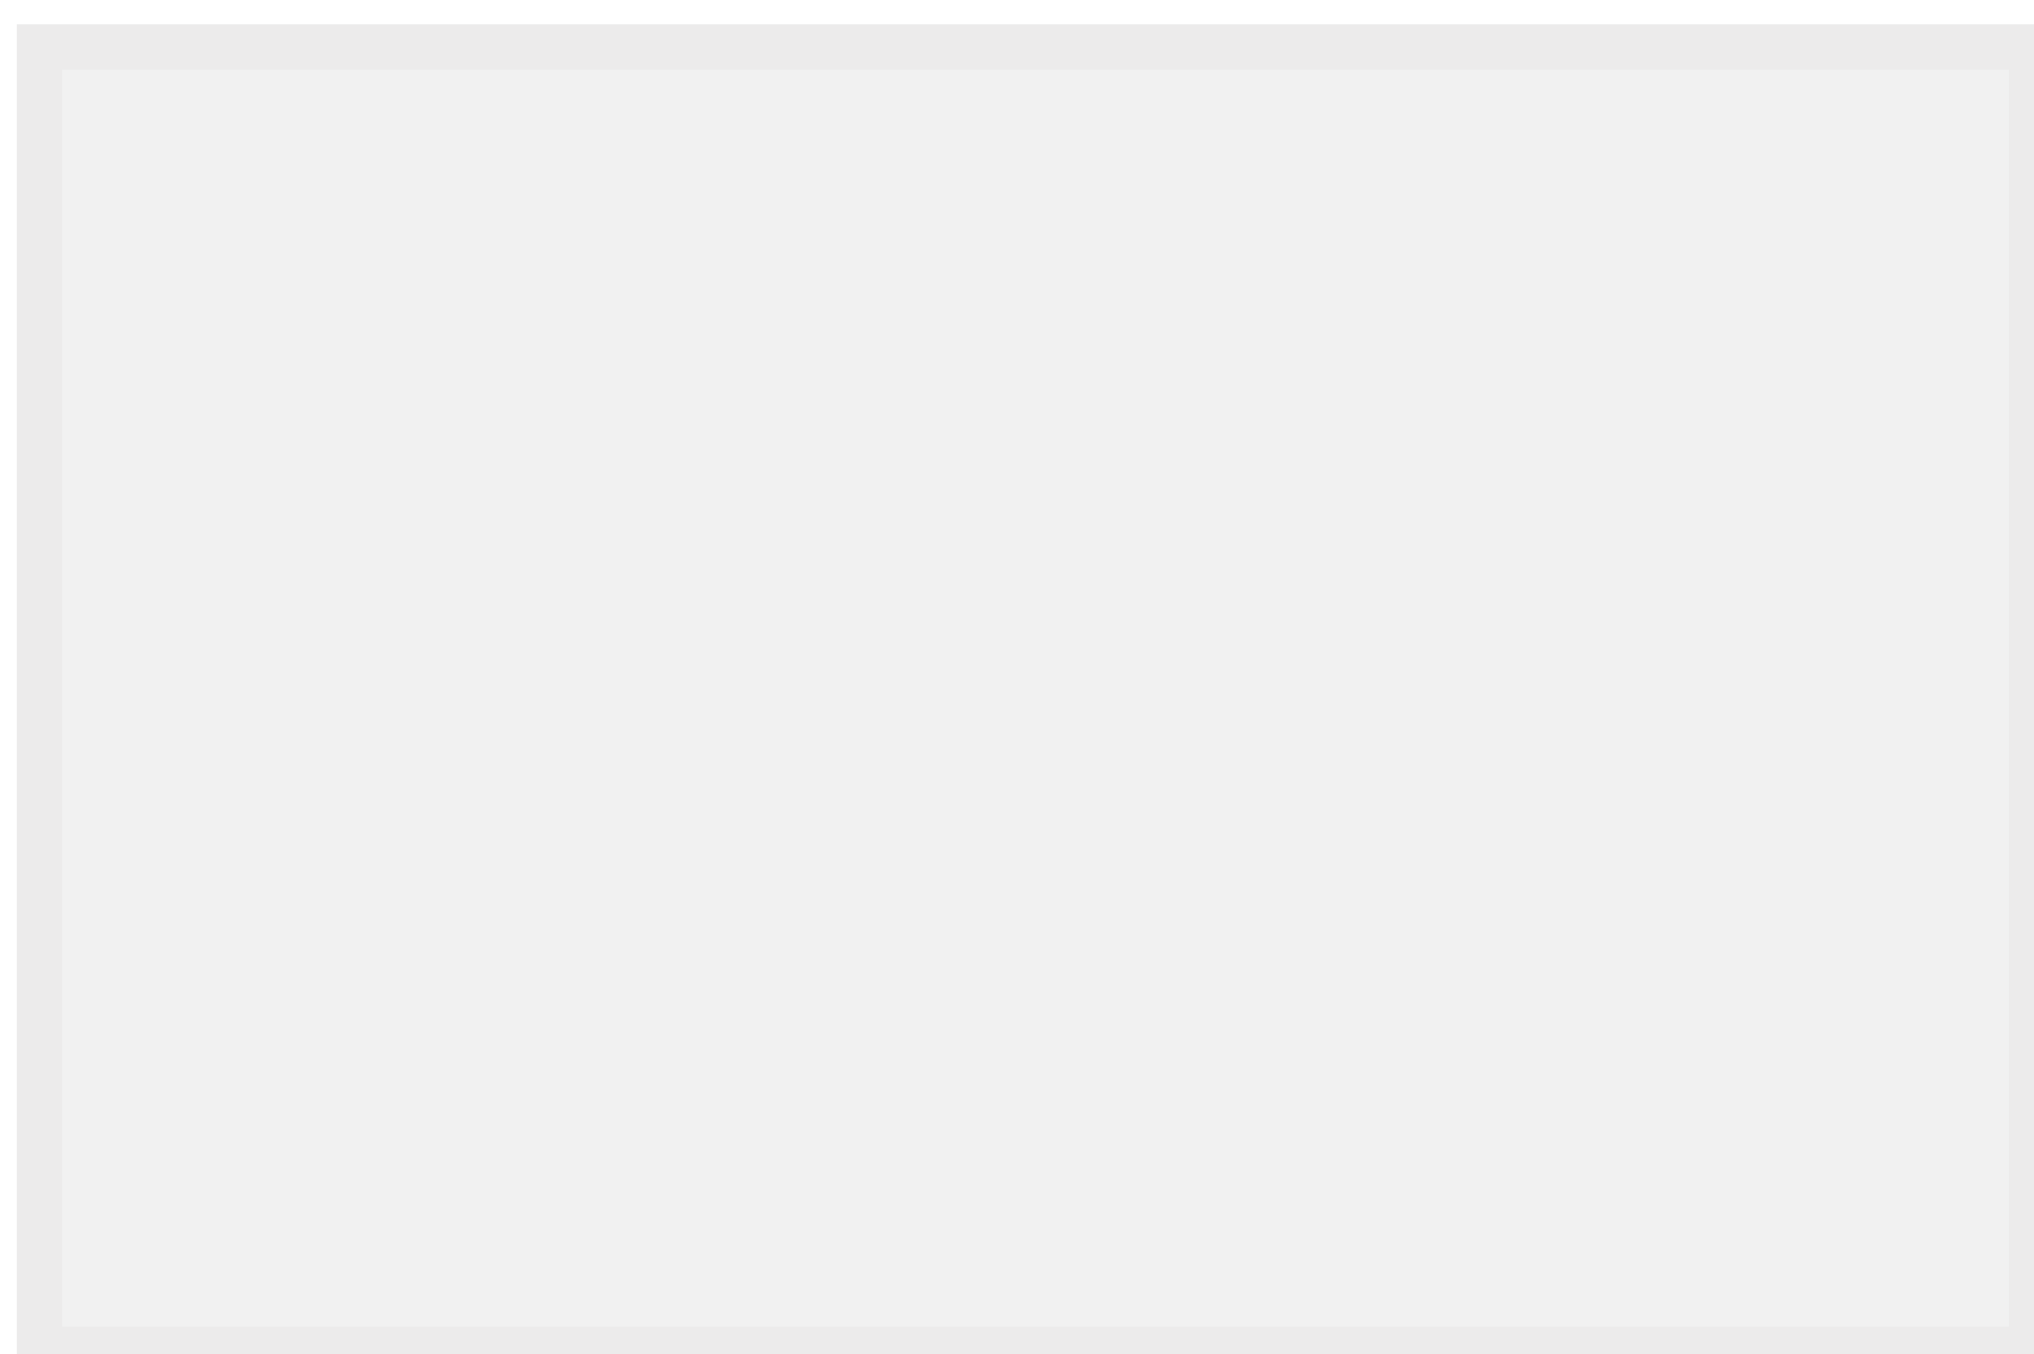

MIT  
STUDENT INFORMATION PROCESSING BOARD  
sipb.mit.edu

## What is SIPB?

We are MIT's volunteer student computing group, improving computing at MIT since 1969. Today, SIPB projects provide innovative services and special expertise to the MIT community.

We have an office just outside the Athena cluster in the student center (W20), and you are welcome to come by to ask us for help or to hang around, use our computers, and maybe get involved.

If you are interested in learning more about what we do, please visit our website: [sipb.mit.edu](http://sipb.mit.edu)

## Join SIPB

Come to our meetings:

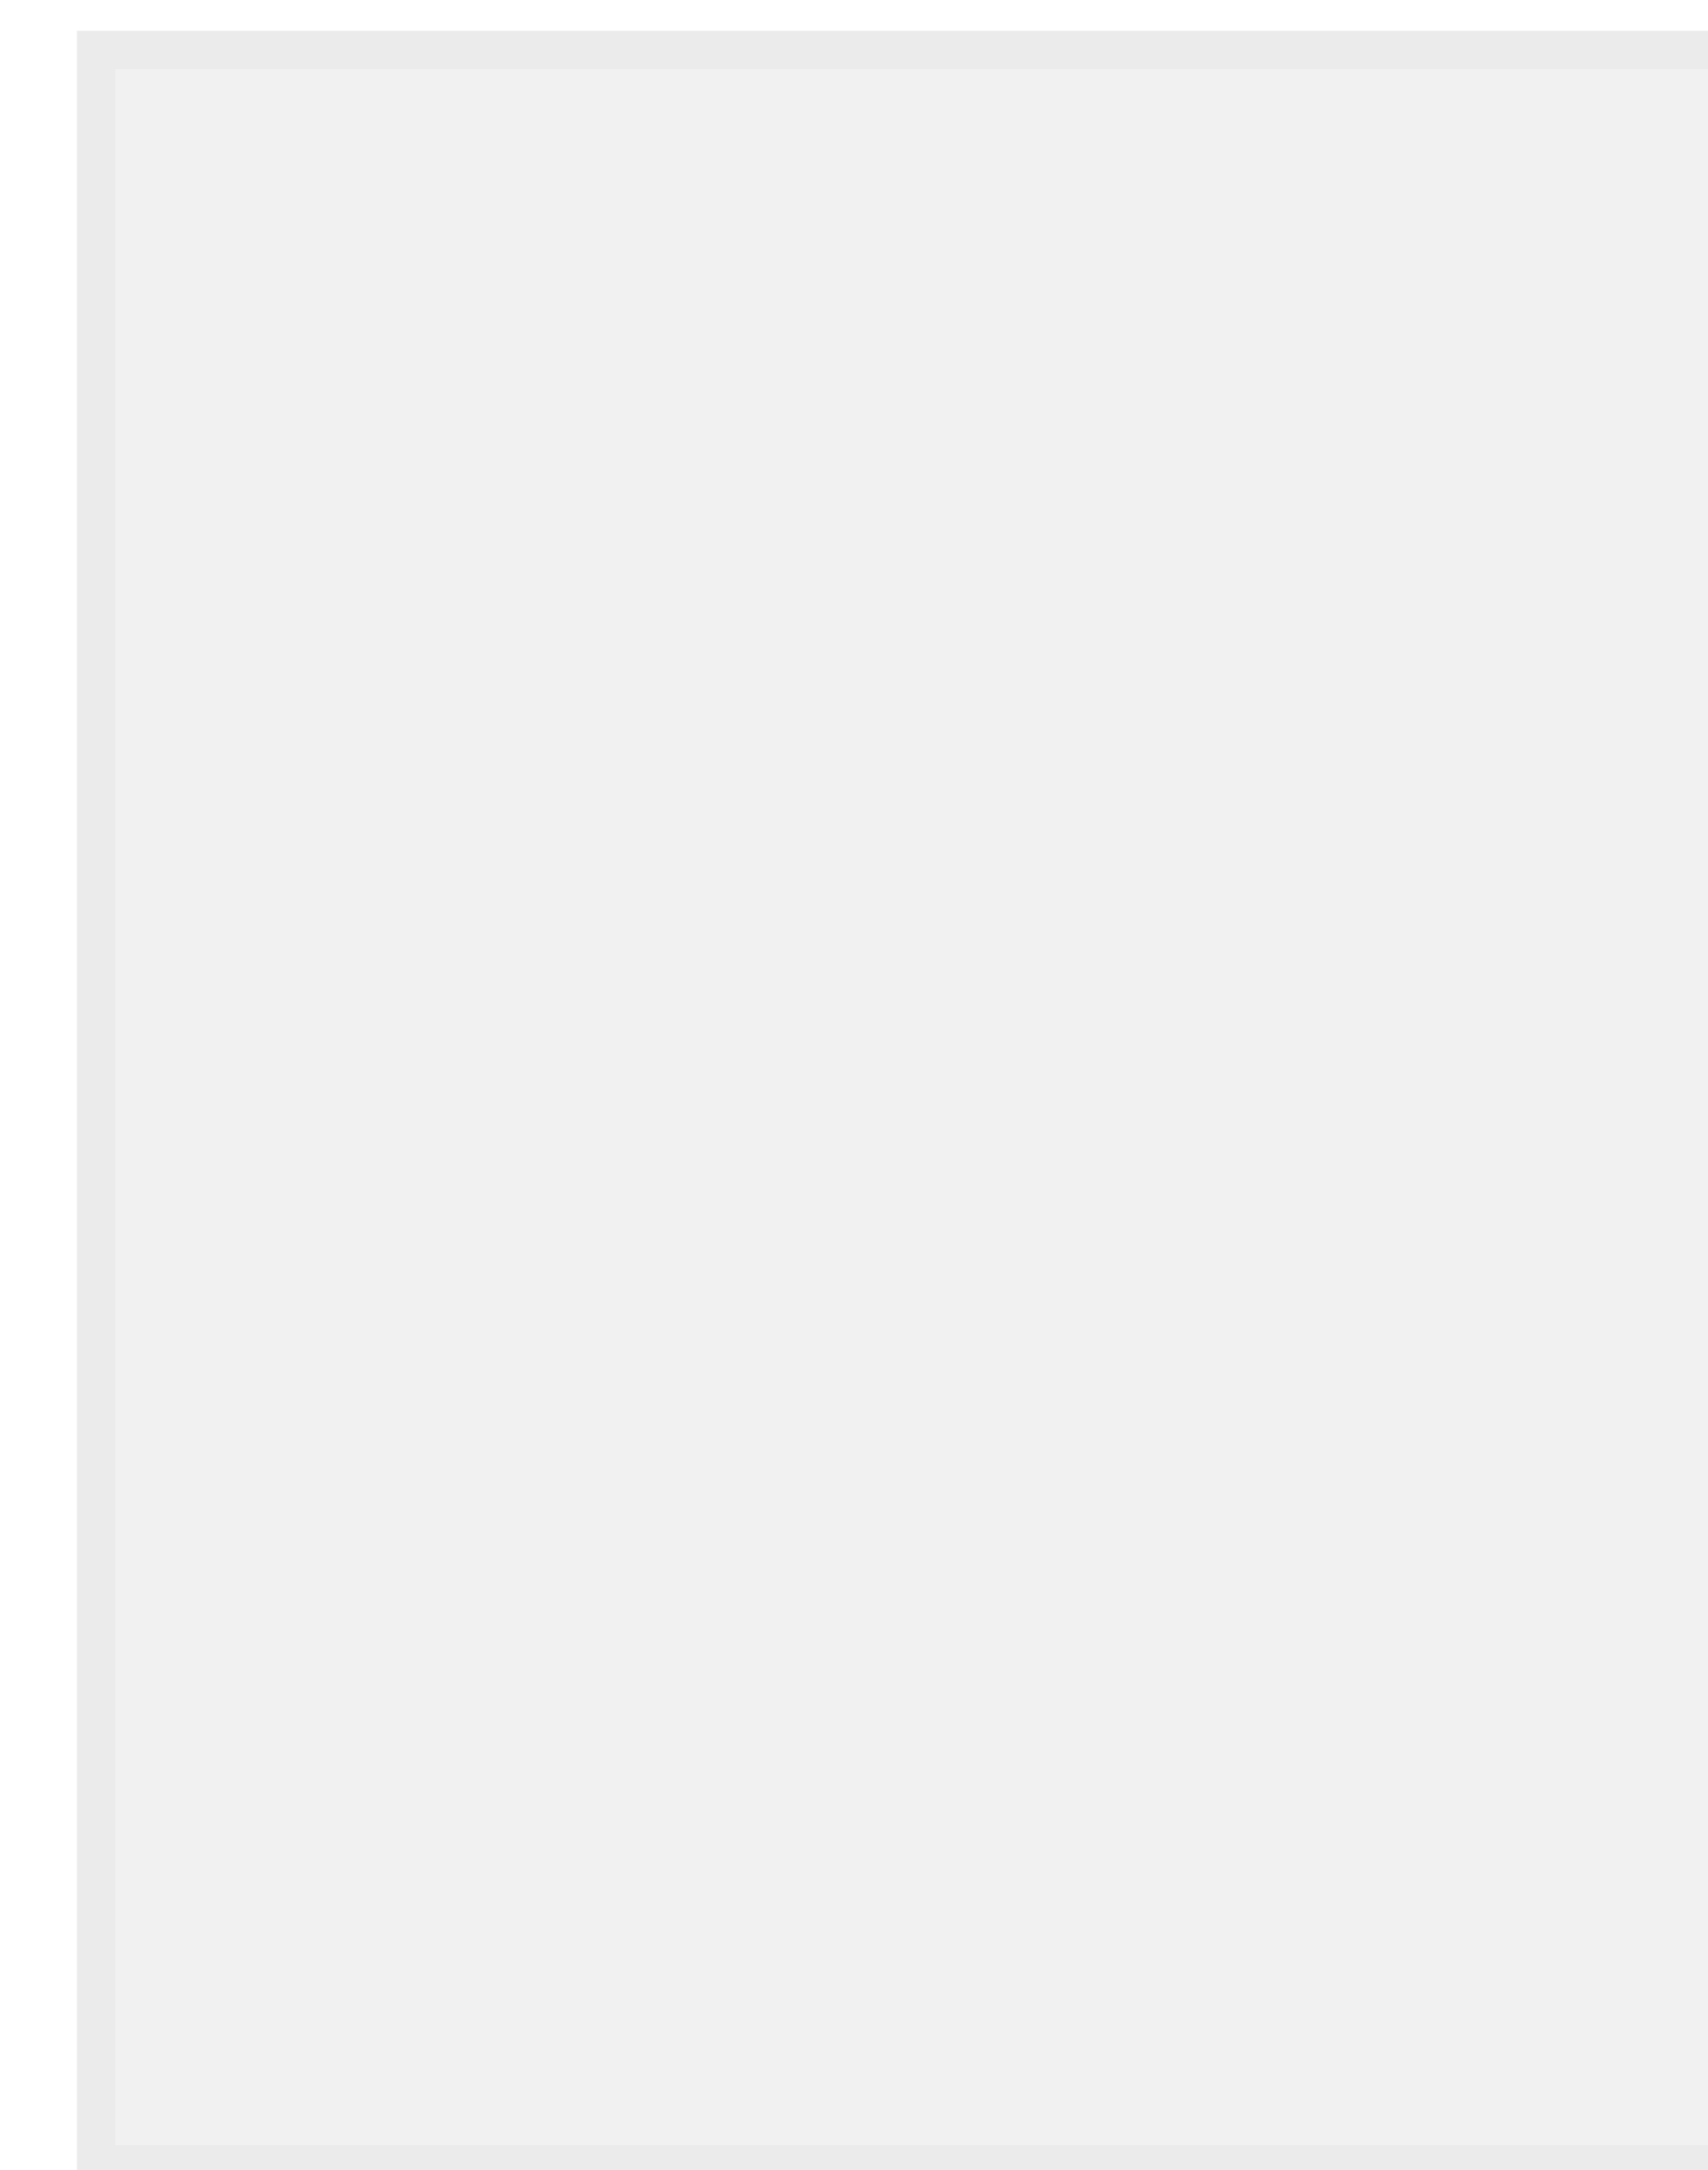

**Mondays at 7:30 p.m. W20-557**

If you are interested in contributing to SIPB's computing services and in helping users with unusual computing questions, consider becoming a member. Prospective members interested in becoming full members should attend our weekly meetings regularly.

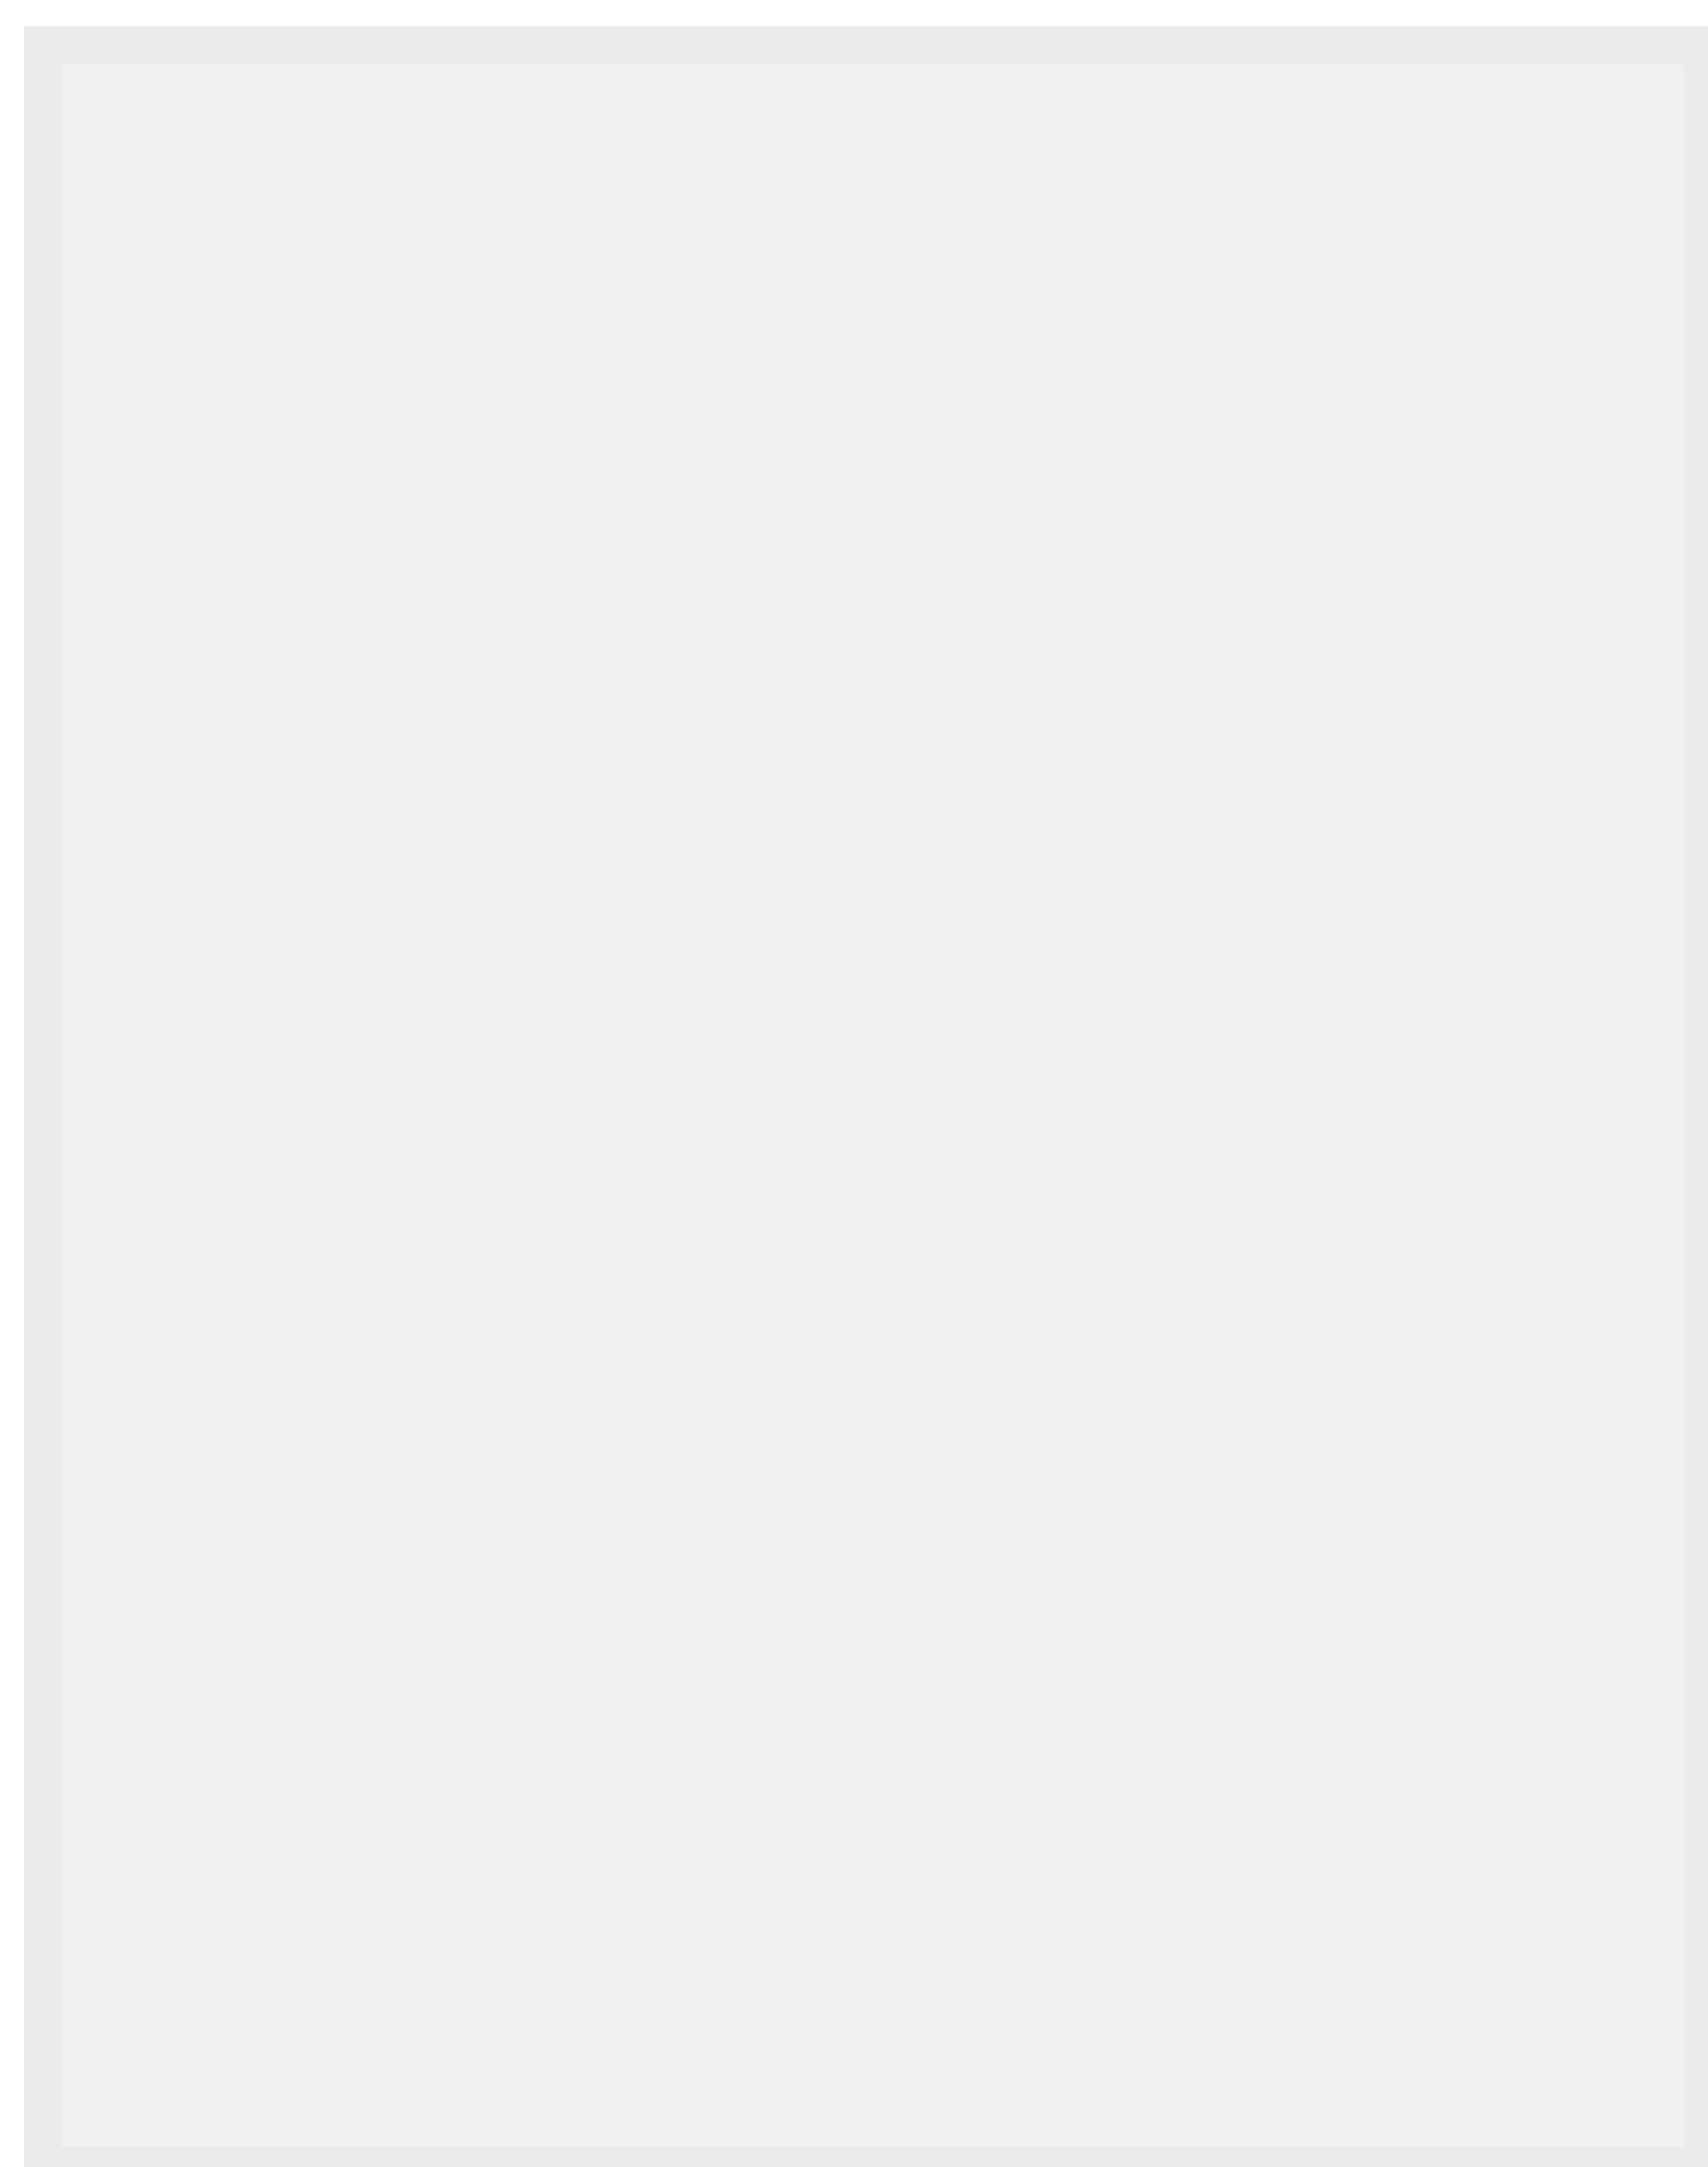

To get involved in SIPB projects, you can hack on an existing project—begin by talking to the people currently working on it—or start a new one. The best way to start a SIPB project is to pick some computing-related problem that is important to you, find some like-minded individuals, and try to solve it, discussing your ideas and plans around the SIPB office, and reporting on your progress to the SIPB. The most successful SIPB projects have often been things that the people involved really wanted to do, and found resources or collaborators to do them through SIPB.

Check out our website at [sipb.mit.edu](http://sipb.mit.edu) for more information.
